

SILVER SERVICE continues during pandemic: although the situation in all European countries and also worldwide creates huge challenges for transnational co-operation, the Silver Service project has managed to continue working on the next outputs and providing relevant and suitable solutions for supporting integration of migrants and supporting senior volunteers.

The development of **Psychographic profiling tools** has been finalised and tools have been tested and evaluated by the project partner. The psychographic profiling tools should help and support the matching of senior volunteers to migrants on the basis of different important matching features.

Also, the development of the **toolbox of civic and social integration resources** was finalised by the project partnership and all tools available to support integration processes on civic and social level in the host society of migrants will shortly be available via the learning platform of the project which you are very welcome to visit and access via the project website.

SILVER SERVICE partners have also been working intensively on the development of the **train-the-trainer programme** which is already available in draft version and will be tested with the target group in the next few months (either in face-to-face pilot trainings in partner organisations or, if the Covid-19 situation would not permit, as online training and webinar). Just consult your nearest project partner if you are interested in participating at this train-the-trainer programme.

Stay tuned and follow us on Facebook!
